Display an embedded Web page in Orion

Updated March 8th, 2018

Use Orion's Custom HTML Resource to embed a Web page in Orion.

To access this functionality:

1. From the Summary page, click **Customize Page**. This option appears on the upper right side of the page.
2. Click the + (plus sign) in the column where the new resource is to appear.
3. Select **Custom HTML** and then click **Add Selected Resources**.
4. Click **Done**.
5. When you return to the original Summary page, click **Edit** in the resource you wish to display.
6. Enter the following:
   
   ```html
   <span style="font-family: 'courier new', courier; font-size: x-small;">
   </span>
   ```
7. Click **Submit**.
